DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 34-37, 39, 42, drawn to tricyclic compounds, classified in class 544, subclass 244.
- II. Claims 38 and 41, drawn to Uses not requiring Formula I compounds, classified in class 514, subclass various.

The inventions are distinct, each from the other because of the following reasons:

Group II is distinct in not requiring any structural similarity with the compounds of Formula 1; the claim could involve the use of compounds which have no heterocycle or P for that matter.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. This is the same requirement as was presented in the parent.

A telephone call was made to Diana Bush on 3/5/02 to request an oral election to the above restriction requirement, but did not result in an election being made. A written restriction was requested.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1624

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
